# 2018 Pelvic Health

Growing Your Practice in Partnership With Opinion Leaders in Pelvic Health

**Spotlight On: Dawn Sandalcidi PT, RCMT, BCB-PMD**

Dawn Sandalcidi PT, RCMT, BCB-PMD specializes in pediatric and adult pelvic muscle dysfunction (incontinence and pain) and orthopedic manual therapy. She is the leading expert in the field of pediatric incontinence in

physical therapy. She has trained medical professionals both nationally and internationally since 1992.

Dawn has actively been treating patients for the past 36 years and owns the private practice clinic Physical Therapy Specialists in Centennial, Colorado. She develops educational materials for health care providers and provides consulting services through DSD PT Consulting. Contact dsdptconsulting@gmail.com for more information.

Dawn received her degree in physical therapy in 1982 from SUNY Upstate Medical Center in Syracuse, New York. She participated in extensive international postgraduate studies in manual and manipulative therapy of the spine and extremities in Germany, Switzerland, and New Zealand. In 1992, Dawn completed an additional two-year residency with Mariano Rocabado to become a Rocabado Certified Manual Therapist (RCMT) and instructor for the spine, pelvis and craniomandibular (TMJ). Dawn is also Board Certified Biofeedback in Pelvic Muscle Dysfunction (BCB-PMD).

Also in 1992, Dawn became the first physical therapist to treat pelvic muscle dysfunction in the Denver area. Since then she has developed a pediatric dysfunctional voiding treatment program.

In addition to lecturing internationally on pediatric bowel and bladder disorders, Dawn has also lectured on pelvic pain for CPD Health Courses for osteopaths, manual therapists, and acupuncturists in Melbourne, Australia. In 2017, Dawn was invited to speak at the World Physical Therapy Conference in South Africa about pediatric pelvic floor dysfunction and incontinence.

**New! Pathway® NMR 200 for Pediatric Pelvic Muscle Rehabilitation & Voiding Dysfunction**

See it Demonstrated at Dawn's Pediatric Courses:

- \* Pediatric Functional Gastrointestinal Disorders
- \* Pediatric Incontinence
- \* Pediatric Incontinence and Pelvic Floor Dysfunction

**The Pathway® Ultrasound Imaging System for Lumbopelvic Rehabilitation**

Want to Learn More?

**Ultrasound Lab Included in Pediatric Functional Gastrointestinal Disorders Course**

Courses Offered By:

**Hands-On Ultrasound Imaging Course: Rehabilitative Ultrasound Imaging: Women's Health and Orthopedic Topics Course**

"I use ultrasound for many reasons in my field. Not only can I use it for retraining the Pelvic Floor, Transverse Abdominis and Multifidus in addition to diaphragmatic breathing in my adult population for core use, I also LOVE it for my Pediatric population. The kids love the "jelly bellies" to see what is left in their bladders (PVR), in addition to actually visualizing the action of the PFM in a non-invasive manner."

- Dawn Sandalcidi PT, RCMT, BCB-PMD
